

THE BLAIRMORE ENTERPRISE

VOL. XIV, NO. 8.

BLAIRMORE, ALBERTA, THURSDAY, FEBRUARY 22, 1923.

\$2.00 YEARLY

NOTICE

If any Cricket enthusiasts in the towns of Bellevue, Hillcrest, Coleman, Lundbreck, Cowley and Pincher Creek are interested in forming a league they are cordially invited to communicate with James Crowder, of

Blairmore. A number of local players are anxious to form a league and if some of the above towns can become interested a lively time is expected here this summer among the followers of the Old Country's National Pastime.

BLAIRMORE HOCKEY TEAM ARE ALBERTA CHAMPIONS

The local hockey team made short work of the Edmonton champions, the South Stars. The first game on Saturday night ended 7 to 1 for Blairmore and the second game, while the visitors played strong, was also in favor of the locals by 4-7. The locals put on a burst of speed in the last period of Monday night's game that had the Edmontonians completely out-classed and scored six goals in nine minutes. The total was Blairmore 19, Edmonton 8.

By winning these games Blairmore was the Alberta Amateur Hockey Championship and the Herald-Journal Cup, which goes with the title. They will now represent Alberta for the Allan Cup, playing off with the champions of British Columbia in a few days. For the Crow League honors, they will take possession of the Wright Cup.

The goals and assists of Blairmore in the two games were made by the following:

Name	G	A	Pts.
Mackie	8	1	9
Bennick	5	3	8
Reddick	2	1	3
Turner	2	0	2
Pruden	0	2	2
LeVasseur	1	1	2
Veprava	1	1	2

Paper barrels designed to withstand as rough treatment as wooden ones are something new. They are made by a simple machine, which rolls a thick paper under tension into the desired shape and at the same time applies an adhesive to each layer of the paper. The workman can make a barrel as thick and as strong as he wishes.

COUNCIL MEETING FRIDAY

Owing to the hockey game, Blairmore-Edmonton, being scheduled for Monday night, the regular meeting of the town council was held on Friday night last instead.

Very little business came before the meeting. The minutes of last previous regular meeting were read and approved, and the following accounts were duly passed for payment: Crown Life Assurance Co. \$502.08, A. Fife \$551.04, Blairmore Pharmacy \$241.0, J. H. Putnam \$62.50, Blairmore Enterprise \$383.70, Paul Barnhill \$47.0, West Canadian Collieries \$463.25, C.P.R. \$167.0, James G. Ewan \$500, S. J. Sargent \$500, F. Wright \$100.00, Alberta Government Telegraphs \$117.0, J. H. Dickson \$5.25, Charlie Fauver \$4.00, R. Crawford \$25.35.

Applications for not drink licenses from A. Red, A. Oliva and Cominica Passaluna, were approved.

By-Law No. 80, governing electric light and power, was read a first second and third time and finally passed. This by-law will be found elsewhere in this issue.

There were present at the meeting Mayor McLeod and Councillors Owen Morgan, J. Angus McDonald and J. A. McDonald.

The last regular meeting of the present council will be held on the night of Monday, February the 26th, and the organization meeting of the 1923-24 council will be held on Monday, March 4th, at 8 o'clock.

KEEP DATE OPEN FOR UNION CHURCH ANNIVERSARY

Members and adherents of the Union church are looking forward with interest to the approaching Anniversary Sunday, March 4th. On that date, special services will be addressed by Dr. George W. Kerby, principal of Mount Royal College, Calgary, one of the foremost of Canadian orators. Dr. Kerby will address a Young People's service at 11 a.m.; the Sunday School at 2:30 p.m., and the evening service at 7:30.

On the Monday night following, March 5th, Dr. Kerby will deliver his latest popular lecture, entitled, "The Educational Challenge."

HAROLD MAGES KILLED BY TRAIN

An unfortunate fatality occurred near Coleman station on Sunday afternoon last, when Harold Mages, a lad of about eighteen years, attempted to board a moving freight train and was dragged in under the wheels and crushed to death, both legs being cut off just below the hips. The boy intended coming to Blairmore and the train happened along just as he was starting out to walk.

Death was about instantaneous. The mangled remains were gathered up and given in charge of the police and later to Undertaker Ferguson, who had them prepared for burial.

A coroner's inquest was held on Monday. The remains were interred in Coleman cemetery on Tuesday. The funeral was very largely attended. A very impressive service was held at the Institutional church, by Rev D. K. Allan.

The boy's father was killed in a Pass mine a couple of years ago and his mother died shortly afterwards. For a number of years the family resided at Bankhead. One brother, a crippled veteran of the late war, survives.

EARLY RISERS

Word has just been received from the ranch of Joe Morgan, near Lundbreck, that on Tuesday of this week their pet "biddy" hatched out ten fine hardy chicks. Rather early, don't you know? But anything is possible in Alberta.

If the members of the Crow's Nest Chapter, I.O.O.F., would kindly send their respect to Mrs. W. A. Henderson by the 28th of February, it would be greatly appreciated, as otherwise

it will be impossible to have the book ready before March 15th.

A blind pig was never named after the swine element because it squealed.

Cash and Credit

A person without money or property usually has little credit, even if his integrity is well known. Credit is based on capital, and capital is the result of saving. Credit is not a gift; it is a growth. It comes through earnest effort long continued. Some day you will need it.

Saving is the first step to good credit.

Sir Henry Thornton

Seldom has the action of a Government received such unanimous approval as was accorded by press and public, political friend and political foe to the selection of Sir Henry Thornton as President of the Canadian National Railways. Prior to the announcement of his appointment, there was a feeling of apprehension in many quarters that a purely political appointment might be made, or that someone unfriendly to the principle of public ownership might be chosen, or that a man of rather ordinary ability as a railway executive and administrator would be selected. In fact, predictions were not lacking that no really big railway man with a reputation to lose could be found who would undertake the very formidable task of endeavoring to solve Canada's national railway problem.

These apprehensions were definitely removed when it was made public that Sir Henry Thornton had been offered and had accepted the position he now occupies, and that the selection of Sir Henry and his colleagues on the board of directors of the C.N.R. would be quite untrammelled, politically, in their administration of this great national system.

Sir Henry Thornton first made a reputation for himself as a railway man on the Pennsylvania system, one of the best managed railways in the United States. He was called to England to undertake the task of re-organizing and making efficient one of the principal railways in the British Isles, a work he carried through with marked success. During the Great War, Sir Henry once again proved his ability as an energetic and successful railway administrator.

In assuming the duties and responsibilities of chief executive of the Canadian National Railways, Sir Henry has undertaken what is admittedly one of the hardest propositions in the railway world today. Fortunately for himself and the country, he fully appreciates that fact. He realizes that success in operating a railway which possesses the greatest natural ability of any one system in the world is not to be attained through the introduction of merely minor or piecemeal policies and reforms. The task requires vision and statesmanship.

In public speeches made since his arrival in Canada, and particularly during his recent tour of the West, Sir Henry Thornton has displayed a real grasp of the problem confronting him and the people of Canada. The railway, first and foremost, must render service to the people of Canada who own it and built it that such service might be given. It is a railway operating across a continent as yet but sparsely populated. It must, therefore, be managed as to promote the development and settlement of the country. In order to accomplish this, the service given must be efficient and the rates charged moderate.

Sir Henry Thornton has not been at all backward in declaring that every effort must be put forth to increase the population of the Dominion; that only through such increase can the railway be made a paying proposition. In other words, while the railway will demand a large and ever increasing volume of traffic, both passenger and freight. Economies in management and operation must be effected wherever possible, but this must not be done at the expense of efficiency in service, nor at the expense of the country by charging its national function as one of the chief agents in the development of the Dominion.

Equally frank has Sir Henry been in his declaration that the prosperity of Canada depends that agriculture in Canada be prosperous, and he has expressed the opinion that transportation within Canada must be adjusted so as to assist in promoting the development and prosperity of agriculture. A prosperous condition in agriculture will in itself be the most powerful of all magnets attracting immigration. A prosperous agricultural community will produce the crops which will give the railways the larger traffic they must have. And a prosperous agricultural community will be a heavy buying community, demanding the finished products of the forests, the fisheries, the factories and the mines, all of which means more traffic for the railways.

Finally, Sir Henry has revealed himself as a man who holds that a good workman is deserving of a good wage, fair treatment and a decent standard of living. It is not by the low wages and the inferior service that he has already set up an ideal for all the vast army of C.N.R. employees, and has solicited their co-operation in making their common undertaking a success. It will take time, nevertheless, nothing certain. No time has been lost in amalgamating the several railways into one united national system, and the world is now to witness the spectacle of the greatest experiment in public ownership of railways ever attempted. Canadians have always shown themselves capable of doing big things. They made a wonderful success of the C.P.R. under private management. May they, under the generalship of Sir Henry Thornton, prove equally successful with the C.N.R.

"COLD IN THE HEAD"

is an acute attack of Nasal Catarrh. These subject to frequent "cold in the head" will find that Dr. CHASE'S MEDICINE will build up the system and render them less liable to cold. Reported attacks of Acute Catarrh may lead to Chronic Catarrh. HALL'S CATARRH MEDICINE is safe in Chronic Catarrh, and cures the inflammation and restores the mucous surfaces of the system, thus restoring normal conditions. All Druggists. Write for Free Book. F. J. Chase & Co., Toledo, Ohio.

University Uses Business Methods

It takes over \$6,000,000 a year to operate the University of Michigan. Its business is handled by methods similar to those of the commercial concerns, with an aim at greatest efficiency and effectiveness at lowest cost.

Wicked Competition

A pair of criminals arrested in New York have confessed that they were hired by a laundry company to destroy the work done by another laundry. That isn't the sort of competition which is the life of trade.—Hamilton Herald.

The height of optimism is a patient, who having been told by his doctor that he can't live long, starts to read a continued story in a nightly magazine.

You may induce people to listen to your grievances—but what do they care?

Mother and Her Baby Are Relieved of Eczema

Mr. Peter A. Palmer, Salt Burn, Sask., writes: "Dr. Chase's Ointment has completely relieved me of eczema and piles. I also used it on my baby, who had eczema and piles. A few applications were all that was necessary in her case. Dr. Chase's Ointment has been worth a hundred dollars to me—before using it, I had spent a great deal more than that in unsuccessful treatment from doctors. We have also used Dr. Chase's other medicines, the Nervine Food, having suffered many long years suffering from severe nerve trouble with a girl."

First Underground Railway

London's Tube, Sixty Years Old, Has a History

Days when London's underground railway was used by women in crinolines and men in the top hats and side whiskers of the mid-Victorian period, are recalled by the fact that the Metropolitan Railway has celebrated its diamond jubilee.

The original Metropolitan Railway, which was opened on January 10, 1863, ran from Farringdon Street to Bishop's Road, Paddington, 2½ miles. More than 30,000 people were carried on the opening day and almost as many on each succeeding day.

There was much opposition to its construction. It was asserted that its tunnels would collapse, that the vibration would make the houses above it uninhabitable, and that passengers would be asphyxiated by fumes.

So much resistance was offered to the construction of Regent's Park that the tunnel had to be in order to pass under a subway running from Park Crescent, under the Marylebone Road to Park Square.

There were many other engineering problems to be solved. The Fleet Ditch sewer (which the railway crosses three times), had to be diverted. During the work of construction the sewer burst at Farringdon Street, causing great damage. All obstacles were overcome, however, and today the tunnels, built 66 years ago, and cased in rings of brick eight deep, are firmer than when they were built.

Horseness Rubbed Away Quickly By Nerviline

Changeable weather causes congestion and sore throat. The blood must be drawn from the inflamed part, and this is speedily done by applying Nerviline. The beauty of Nerviline is that it penetrates quickly. It is not only and every drop sinks right in. It draws out the inflammation, eases the pain, makes the chest and throat well quickly. For relieving coughs, colds, hoarseness, Nerviline is the proper remedy. Thousands say so. Large 5¢ bottles sold everywhere.

Winnipeg Bank Clearings

Bank clearings in Winnipeg in 1922 amounted to \$2,583,825.74, the municipality ranking third among Dominion centres, coming after Montreal and Toronto and being followed by Vancouver.

MOTHER! MOVE CHILD'S BOWELS

"California Fig Syrup" is Child's Best Laxative

Even a sick child loves the "fruity" taste of "California Fig Syrup." It is the little stomach is upset, tongue coated, or if your child is cross, feverish, full of cold, or has colic, a teaspoonful will never fail to open the bowels. In a few hours you can see for yourself how thoroughly it works all the constipation poison, sour bile and waste from the tender, little bowels and gives you a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

Old-Timers' Re-Union

Pioneer Men and Women Hold Meeting at Calgary

Meeting in Calgary for their annual reunion and "round-up" more than 500 old-timers and pioneer women who have been in Alberta for more than thirty years, exchanged reminiscences and renewed the days of their youth in a young western. Both men and women have formed organizations which came into being two years ago, and the membership rules strictly prohibit the admission of anyone who has not spent the prescribed thirty years in the province.

Halley's comet, which was first discovered in 240 B.C., will again appear in 1986.

Minard's Liniment for Failing Out of Bed

W. N. U. 1469

DR. HAMILTON'S PILLS
 FOR HEADACHE, BILIOUSNESS, CONSTIPATION, INDIGESTION, KIDNEYS, LIVER, BOWELS.

Game Hunters Must Wear White
 The Alberta Legislature has passed an amendment to the Game Act which by in future will make game hunters wear white material, including a cap, this being to prevent as far as possible shooting accidents in the woods.

WINTER WEATHER HARD ON LITTLE ONES

Our Canadian winters are exceedingly hard on the health of little ones. The weather is often so severe that the mother cannot take the little one out for an airing. The consequence is that baby is confined to overheated, badly ventilated rooms; takes cold and becomes cross and peevish. Baby's Own Tablets should be given to keep the little one healthy. They are a mild laxative which regulate the stomach and bowels and thus prevent colds. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Saskatchewan Poultry

Value of Industry is Shown by Figures For 1922

During 1922 farmers in Saskatchewan realized about \$1,353,000 from the sale of poultry, and about \$1,019,191 from the sale of eggs. It is estimated that Saskatchewan has 9,250,000 head of poultry, allowing approximately 54 birds per farm. Recently nine carloads of eggs were shipped from the province to England by the Saskatchewan Co-operative Creameries and exports pronounced the eggs to be excellent upon arrival in that country.

Dye Blouse Or Baby's Coat In Diamond Dyes

"Diamond Dye" adds years of wear to worn, faded skirts, waists, coats, stockings, sweaters, coverings, hangings, draperies, everything. Every package contains directions so simple any woman can put new, rich, fadeless color into her worn garments or draperies even if she has never dyed before. Just buy Diamond Dyes—no other kind—then your material will come out right, because Diamond Dyes are guaranteed not to streak, spot, fade, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.

Incoming Settlers

Figures Showing Number of Immigrants Received by Western Provinces During Last Year

Immigrants coming to Western Canada from or through United States ports during 1922, numbered 5,995 persons, showing a decrease of 2,521, as compared with the preceding year, according to immigration officials. With them, this year's coming brought \$251,121 in cash and goods to the value of \$727,248. Manitoba received 1,140 of the new arrivals; Western Ontario, 412; Saskatchewan, 3,512; Alberta, 4,033; and British Columbia, 198.

The first white man to set foot on New York soil, landed at Coney Island, September 6, 1609.

Solved Telephone Mystery

Lineman Located Simple Reason For Interruption of Service

Apparently of its own accord, says Popular Mechanics, a rural telephone line in a remote district of Colorado went on strike for a sixteen-hour working day. During the daylight hours the line worked perfectly, but between nine and ten every night something happened, and the telephone would not work until morning. Finally, the lineman with a lineman started on a nocturnal double hunt.

Early in the morning they reached the last house on the line and were admitted by the aged occupant. Conspicuous on the top of the wall telephone were his six straggled specimens that resided in electrical contact across the terminals, where it was his habit to leave them every night. The mystery was solved.

Inspection of Eggs from U.S.

To Check Grading Evasion By American Egg Shippers

The Canadian Government has taken steps to prevent egg shippers in the United States evading the regulations governing the shipment of eggs in Canada. An order-in-council directs that in future, all egg shipments entering Canada from the United States will be inspected and graded. Under the former regulation, inspection was confined to shipments of more, but it was found shippers in the United States were evading inspection by making shipments of less than 10 cases.

His Flesh Horribly Burt

His druggist sold him a cheap Acid corn remedy instead of giving him good old reliable Putnam's Corn Extract which has been for fifty years the standard remover of corns and warts. "Putnam's" never fails. It is always a substitute. 25c everywhere. Refuse a substitute.

Of Strange Significance

Where the Same Speech Seems to Fit Two Occasions

Oswald Garrison Villard, the brilliant New York reformer, said the other night in Cooper Union: "It is strangely significant that a convict taking his place in prison and a legislator taking his place in our legislative halls might both make the same speech."

"I assure you, gentlemen—so they might begin—the place has sought me and not I the place. My own affairs demand all my time and attention, and I may truly say that my selection to this position came as an entire, even as an unwelcome, surprise. Had I consulted my own interests I should have peremptorily declined to serve, but, gentlemen, I am in the hands of my friends, and I see no other course but to submit."

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

The spoon is a little thing that creates a stir in every household.

WOULD LIE AWAKE HOUR AFTER HOUR

Tanlac Brought Mrs. Stewart Relief Just As She Was About To Go To Hospital.

"For four years before I took Tanlac I never knew what it was to have a 'well day,' recently declared Mrs. Mary Stewart, North Albert Street, Regina, Sask.

"It all resulted from a spell of the 'flu,' which left me almost a nervous and physical wreck. A good night's rest I rarely ever had and many a night I could not close my eyes in sleep at all. I felt so tired and worn out all the time I simply dragged myself through the day. To tell the truth I was so weak and nervous I couldn't pour a cup of tea or dip up a spoonful of sugar without spilling it."

"I lost thirty pounds in weight and felt so miserable I had about made up my mind to give up and go to the hospital. I also had rheumatism all over my body and my legs pained me so bad at times I could hardly walk. Since taking Tanlac my troubles are gone and I have regained twelve pounds of my lost weight. I eat and sleep like a child and feel fine. I just think Tanlac the greatest medicine on earth."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.

Build Russian Navy

The workers of Soviet Russia have pledged themselves to bring the navy to a state of efficiency equal to that of the army; and in some cases they have agreed to furnish funds for ship construction. Another result of the week's campaign in behalf of the Russian navy has been the enlistment of more than 2,000 men for the naval service.

Progressive Member Says Grain Marketing Far From Satisfactory

Ottawa.—Formation of a commission to inquire into the grain trade of Western Canada with a view to reaching a permanent solution of the grain marketing problem was moved in the House by John Millar, Progressive member of Qu'Appelle. Mr. Millar declared that the grain marketing situation in the west was far from satisfactory. Numerous allegations of wrong doing had been made and it was in the interests of both east and west these should be investigated. An organization of grain buyers in Winnipeg had made serious charges against the grain trade and alleged there was collusion between the grain trade and bonding houses with which the buyers were bonded to keep them in submission. There was more than a suspicion that the farmer was penalized in many ways when he sold his grain.

A commission was necessary to investigate these charges, because the committee of the House which has been named to investigate this situation could not possibly cover all its ramifications.

The farmers of the west felt they were not getting justice when they had to sell their grain. Among the problems to be investigated by a commission, Mr. Millar cited the practices of mixing. He had not known that scutling was practiced to any large extent at Winnipeg, but it had been practiced extensively at Minneapolis, and the two markets were closely connected. Dr. Magill, of the Winnipeg Grain Exchange, he said, in a published statement that must have cost a good deal—for all knew that advertising was expensive—had said that all the trade took out of wheat was 42 cents a bushel. Everyone who knew

the Grain Exchange and the number of its employees, said Mr. Millar, would know that it could not live on that small amount; there must be underground ways of taking profits.

HOSPITAL DOCTORS STRIKE

P.E.I. PATIENTS MAY BE WITHOUT MEDICAL CARE.

Charlottetown, P.E.I.—All the medical members of Prince Edward Island Hospital have gone on strike on account of grievances of a professional nature which the staff considered should have received more prompt attention. They set a definite time during which a doctor should practice in the city before becoming eligible to membership on the staff, also that in major operations he should have either five years practice or a post-graduate course, or have served as an intern in a private hospital. The trustees declare they were taken completely by surprise. The immediate result of the strike will be that patients after the last of this month, when the present ward doctor's period of time expires, will be without medical attendance and that nurses in training will be deprived of lectures and have their graduation delayed.

Pentel Church Burns

Pentel, Sask.—Fire which started at 2:30 o'clock at night completely destroyed Notre Dame, d'Auvergne Roman Catholic Church, all its contents, save one church, and caused a total loss of \$40,000, practically covered by insurance. The fire is believed to have originated from a defective fuse in the furnace in the basement.

Fined For Rand Revolt

Johannesburg, S.A.—Richard Acton, a member of the Transvaal Provincial Council, has been found guilty of participating in the rebellion on the Rand last summer and supplying the rebel forces with ammunition and has been fined £200, with the alternative of imprisonment for five months with hard labor.

Unemployment Reduced

London.—Unemployment figures for the United Kingdom were reduced by 24,600 last week.

THRILLING STORY OF RESCUE AT SEA

THREE SHIPS ARE LOST OFF THE B.C. COAST

Vancouver.—The graveyard of the North Pacific took a toll of three ships as the result of the gale which swept the British Columbia and Washington coast lines, but not a life was lost, although rescue work was conducted in a heavy running sea.

The vessels lost were the Tuscan Prince, which went ashore on Estevan Point; the steamer Nika, which burned to the water's edge near Unstilla Reef; and the freighter Santa Rita, lodged high on a rock ledge near Clouzeau, Vancouver Island.

The men of the Santa Rita can attribute their safety to the heroism of Victor Haupt, who tied a line along his body, plunged into raging seas and swam to shore. A breeches buoy was rigged up and the 30 members of the crew were transferred to shore. The Santa Rita was rushing down the coast when she struck the rock. The crew of the Nika, 33 in number, were rescued by the coast guard cutter Snolmholm. Boats could not be launched because of the high seas, so the Snolmholm took a chance and pulled up close alongside the Nika, taking most of the crew off with an improvised lifeboat. The others plunged into the water and were picked up.

Paper Again Issued By 7th Battalion

Col. Brothers Is Editor of "Listening Post"

Montreal.—The trench publication, "The Listening Post," issued during the war by the 7th (British Columbia) Battalion, has been revived and the first number of the reconstituted periodical, published in Montreal, has made its appearance. Contributors to the issue are Sir Arthur Currie, Stephen Leacock, Lord Longfellow and others. The editor of "The Listening Post" is Lieut.-Col. C. E. Brothers, leader of the 7th Battalion and former commandant of the 1st Canadian Divisional Training School.

Breaks Shipbuilding Record

German Industry Has Not Suffered From General Depression

London.—Germany has beaten her pre-war shipbuilding record, according to figures published here. Her output in 1922 was 625,000 tons, as compared with 560,000 tons in 1921, 440,000 tons in 1914, and 465,000 tons in 1912.

The German shipbuilding industry does not seem to have suffered from the general depression and, owing to the low cost of production, it has apparently become a formidable competitor to the industry in the United States and Great Britain.

Miners Want Improvement

Cumberland, W.C.—Determination not to go down into the coal mines again until working conditions are improved was reached at a mass meeting of miners which appointed a committee to interview the management. The committee was instructed to ask that the long wall system of mining in No. 4 mine be eliminated. A resolution urged that all Orislands be expelled from work underground, their presence being regarded as detrimental to the safety of white miners.

Germany Paid Bills

Brussels.—German treasury bills issued in connection with Germany's agreement to pay Belgian reparations were met when they fell due Feb. 15.

The Boycott Battle In Germany Is Now Becoming More Acute

Essen.—The boycott battle between the Franco-Belgian occupational forces and the Germans is daily becoming more acute in the Ruhr, particularly in Essen. The most noticeable features are the failure of co-operation on the part of the German police and the refusal of hotels and merchants to

They are Worth their Weight in Gold

New Brunswick Man Cannot Say Too Much in Favor of Dodd's Kidney Pills

He Advises all Persons who Suffer from Kidney Disease to use them. Please Read, N.B.—(Special).—From all over New Brunswick reports are coming telling of the popularity of Dodd's Kidney Pills as a remedy for all forms of kidney trouble.

In every place, however small, there appears to be at least one person who has tried them and found them good. They help to the great Canadian remedy, Mr. Edward Chandler, a well-known resident here is one of them. "I have taken ten boxes of your Dodd's Kidney Pills and cannot say too much in their favour," Mr. Chandler states. "They are worth their weight in gold and I shall advise all who suffer from kidney disease to use them."

Dodd's Kidney Pills have become a family remedy because people have tried them and found them good. They help Rheumatism, Lumbago, Diabetes, Lame Back, Heart Disease and Urinary troubles, because all of these are either Kidney Diseases or are caused by the kidneys failing to do their work.

Smyrna Harbor Mined

French Skipper Signalled From Shore Not to Enter

Marseilles.—Smyrna harbor is thoroughly laid with mines which extend out to sea for a considerable distance, according to the captain of the steamer Pierre Loti, which arrived here. The captain said that when he attempted to enter the harbor the forts signalled him that if he did so it would be on his own responsibility. He said he then requested attached a pilot and, after waiting 24 hours for one, put the ship on her course for Marseilles.

Are Guarding Church

Montreal.—A special guard of Knights of Columbus is reinforcing extra police in keeping watch over St. Michael's Roman Catholic Church at St. Lambert, in consequence of warnings received by Chief Gravel of the St. Lambert police that the church would be burned in the near future. While it was conceded that the communication is believed a hoax, the St. Lambert Council of the K. of C. took a serious view of it and have taken precautions to guard the building until all danger is past.

Russian Jewels Not Found

New York.—None of the Russian crown jewels were found in the coffin of "Sensational" Joseph, when the body, buried in a Brooklyn cemetery, was disinterred by the Government.

Commission Investigating Grain Transportation On The Great Lakes

Refers to Yellow Peril

Sir Edmund Walker Says World May Be Dominated by Asiatics

Toronto.—Sir Edmund Walker, President of the Canadian Bank of Commerce, addressing the Electric Club here, suggested the possibility of the world coming under control of the yellow races if the present declining birth rate among the white nations continued and the yellow races continued to multiply. He pointed to the fact that Japan, which has only half the area of British Columbia, had a population of over sixty million.

Speaking particularly of Japan which he had recently visited, Sir Edmund said it was the duty of Canadians to try to understand the Japanese people and to trade and live with them as world neighbors.

"The sooner we come to an understanding of the kind of relations we are going to have with them, the better," he said.

Free State Troops In Action

Against Irish Irregulars

London.—Nearly 1,000 Free State troops, with airplanes, dozens of armoured cars and howitzers, are taking part in the encircling movement in the Arigna Mountains. County Cavan, against the irregular leader, Bolin, whose headquarters are in the heart of the hills, says a dispatch to the News from Belfast. Irregulars are concealed at points commanding the passes, which are said to be mined.

Work has been suspended by the population over a wide area. In the vicinity, the farm workers watching the extensive operations and listening to the barking of the big guns. Both have with him General Frank Allen, who twice captured Dundalk, at the head of irregular forces.

Will Not Tolerate Ku Klux Klan

Toronto.—"We will arrest the first member of the Ku Klux Klan in Ontario so quickly that he will not know what happened to him," General Williams, Commissioner of the Ontario Provincial Police, is quoted as saying in an interview here, with regard to a letter sent to Mayor Maguire, of Toronto, signed "K.K.K." warning that an orphanage in Hamilton was to be destroyed. "It was for the purpose of disciplining Canadian boat owners that representations were made last year to the Minister of Trade and Commerce to have the coastwise laws suspended, averred James Stewart, former head of the Wheat Board of Canada, when under cross-examination before the royal commission investigating transportation of grain on the Great Lakes. His reason for making these representations was that he objected to steamship owners making a higher charge from Port William to Port Colborne than to Buffalo. It was also stated that as early as September he had made space reservations for October, November and December at four cents a bushel, whereas the average price charged in those months was 10 to 11 cents. He explained that there was nothing morally wrong in a shipper chartering ahead of time unless he happened to gauge the market wrongly. He regarded it as good business if he could guess right. Sometimes a shipper would charter space ahead of time, and at others he would charter a particular boat. Mr. Stewart said there was nothing in the price particularly favorable to him at the time he made the contract. To Dr. McLean, Chairman of the Commission, Mr. Stewart said insurance rates were pretty well standardized, and there had been no change in the last two years.

The Canadian Pacific Railway

WILL FIND

Farm Help for Western Farmers

TO BE OF SERVICE to Western Canadian Farmers and help to meet their needs in securing consistent farm help, the Canadian Pacific Railway is prepared to utilize its widespread organization to provide such help from a number of countries.

THE CANADIAN PACIFIC RAILWAY will now receive and arrange to fill applications for farm help from farmers in Great Britain, Belgium, Holland, Denmark, Switzerland and Norway. In all these countries the Company has representatives who are familiar with the needs of the farmers and who are now in touch with such men and women ready and anxious to come to Canada.

THE GOVERNMENTS of the countries above mentioned have expressed their willingness to aid the emigration of this class of their people. In order to fill such applications satisfactorily and bring the help to the farmer at the proper time and with a clear understanding of the requirements and obligations of each, a printed "Application for Help" form has been prepared which can be obtained from any C.P.R. Station agent or office listed below.

The Company will make no charge to the farmer for this service nor will the farmer be required to make any cash advance whatsoever towards the travelling expenses of his help to the nearest railway station. The information necessary asked for in these application forms, which will be held in strictest confidence, covers the following: name, age, sex, occupation, whether single or married or unmarried; date received and for how long; nationality desired; monthly wages offered; kind of work offered, etc.

WINNIPEG—T. S. Acheson, General Agricultural Agent, C.P.R.
WINDSOR—John Swetling, Industrial Agent, C.P.R.
SASKATOON—W. J. Gorrie, General Agent, C.P.R.

W. J. BARTLETT, PUBLISHER

Blairmore, Alta., Thurs., Feb. 22, 1923

IN SUPPORT OF FISH PROPAGATION

Cowley, Alberta, Feb. 20, 1923.
Editor Blairmore Enterprise.

Dear Sir:—The anglers of Cowley have organized for the purpose of taking up with the Government the matter of restocking the waters in this district and desire the co-operation of all the gentles from Coleman to Macleod.

With this object in view, it is desired that the matter be given publicity, in order that similar societies be organized at points where there are no angling clubs at present.

Will you be kind enough to give space in your valuable paper to the following:

"All fishermen who have in the past enjoyed the royal sport of trout fishing in the various streams of this district are doubtless aware that the trout are rapidly disappearing from the waters.

"As the only solution for remedying this condition would appear to be restocking through artificial propagation, it is the opinion of this Society that steps should be taken toward the establishment of a hatchery in the district.

"Only a united effort will secure success with this object in view this season and we would ask you to request what interested parties in each of the towns of the Press take steps to organize a society, to co-operate to this end.

"The carrying out of this plan will largely depend on the prompt action of other centres in organization and this society will be glad to furnish further information or assist in any way the carrying out of this plan.

"When this is effected, a district meeting can be called at which concerted action can be taken and the Cowley Society trusts that the scheme will meet with approval and the prompt action which is desired."

"Thanking you for your consideration, I am,

Yours truly,

M. A. MURPHY.

Pres. Cowley Angling Society.

RE-STOCKING WATERS IN WATERTON LAKES PARK

The planting of trout fry and eggs in the outlying lakes and streams of Waterton Lakes National Park was carried out with gratifying success during the past season. In his report to the Commissioner of Canadian National Parks, the Superintendent states that the fry released are maturing rapidly and that there is every reason to believe that they will survive the winter.

Through the co-operation of the officials of United States Glacier National Park, which adjoins Waterton Lakes park, at the international boundary, two consignments of fry and eggs were brought into the Canadian park from Glacier and distributed in the headwaters of Cameron and Bertha lakes and Boundary and Little Kootenay creeks, while fry were secured from the Banff hatcheries for Waterton Lake.

Nearly seventy thousand Eastern Brook and Rainbow trout fry were received from Glacier and these were released in Bertha and Cameron lakes and Little Kootenay creek, while two hundred and fifty thousand eggs of the Cutthroat trout were planted in Boundary Creek.

Salmon trout were introduced into Waterton lake in large numbers. Sixteen cans of fry were received from Banff and turned loose with very little loss.

SITTING OF ROYAL COMMISSION

Announcement has been made that the Royal Commission, appointed by the Dominion government, to hear evidence regarding complaints and grievances of ex-soldiers on pensions and re-establishment or procedure in connection with present regulations, will sit in Calgary commencing on the morning of March 15th. The Commission will arrive in the city two days previous and will spend the interval in visiting the office of the Department of Soldiers' Civil Re-establishment and Veterans' hospital there.

E. H. Stannell, assistant deputy minister of the department of S.C.R., Ottawa, who will represent his department when the Commission sits in Calgary, was in the city this week making necessary preparations for the sitting of the Commission. He stressed the fact that the second phase of this enquiry, which grew with the sitting of the Commission at Halifax, will attempt to get the consensus of the opinion of veterans as to needed improvements in procedure and suggest any regarding changes in present soldier legislation or regulation.

Every effort is being made by the various soldier organizations in the city to secure all evidence possible. Veterans in the province who feel that they have a grievance or that they have been discriminated against are requested to outline their cases to any official of any veterans' organization who will forward it to the proper authorities.

PROVINCIAL COAL MINES REPORT

The total amount of coal produced in Alberta in 1922 was 5,976,432 tons, according to figures contained in the annual report of the mines branch for that year tabled in the legislature by Premier Greenfield last Thursday.

Of this amount, 1,445,242 tons were sold for consumption in Alberta, 1,999,789 tons for other provinces and 1,531,391 tons for the United States. Imports of coal from the United States to points east of British Columbia were valued at \$1,000,000 in 1922, a decrease of 925,051 tons below the 1921 importation, while shipments of Alberta coal to all Canadian provinces except British Columbia show an increase over 1921.

Tonnage amounting to 39,827 tons were produced in 1922 in excess of the 1921 production. The largest producer for any month was October, 1922, when the total was 926,888, this being the largest output in the history of Alberta, for any month.

Three hundred and twenty-nine mines were in operation during the year, of which 100 were opened, nine re-opened and 44 abandoned; 57 were closed temporarily. There were 84 prosecutions for contraventions of the act, and 81 convictions. Of these, 22 were workmen, 45 operators and 17 officials.

There were 12,537 persons employed in mines during the month of December being an increase of 301 over December of 1921.

OVERHEARD

Why, man, what are you talking about? We have the wind so bad at Bellevue at times that it blows the roof off the picture theatre. Ask Bill Cole. Whew. That's nothing. Now look here. We have had it so bad in Hillebrand that it once blew a ten-dollar bill out of a Scotchman's hand.

The Language of Prescriptions

A member of the Alberta legislature is advocating in the house that doctors be required by law to write their prescriptions in English and in plain language. But isn't there a danger that the thing may look rather undignified? For instance, a man may feel quite all right in his conscience going around to the drug store with something he does not understand on a slip of paper, but supposing he discovered on the prescription something like this: "Give this bird a pint of good strong gin; isn't it going to be rather shocking?"

ACCIDENTS AND COMPENSATION

Accidents in Alberta reported under the workmen's compensation act totaled 7,518 in 1922 as compared with 7,069 in 1921, according to the annual report of the board given to the legislature. In 1920 the accidents totaled 6,418 and in 1919 they totaled 5,466. Fatal accidents in 1922 totaled 65, in 1921 totaled 55, and 1920 were 61 and in 1919 43.

The average amount of compensation paid per accident in 1922 was \$98.26, and for medical aid, the average per accident was \$58.12. In 1921 the average paid for compensation was \$71.13 and for medical aid \$41.50.

Under schedule 1 of the compensation act, 899 accidents involved medical aid, 1,050 involved compensation and temporary disability, 745 involved permanent disability, and 30 were fatal. Under this schedule 47 dependents of deceased are receiving compensation. Under schedule 2, 547 accidents involved medical aid, 1,620 involved temporary disability and compensation and 69 involved permanent disability. There were 30 fatal accidents, and 62 dependents of deceased people under this scheme are receiving compensation.

During the year the board issued 162 certificates of efficiency in mine rescue work and 259 certificates for efficiency in first aid work. Accident prevention committees have been formed in 170 of the industrial plants of the province.

Assessments under schedule 1 of the act in 1922 totaled \$305,559.45 and under schedule 2 totaled \$254,221.50. There are 3,004 employers now within the jurisdiction of the act.

What is it that a man does standing, a dog does on three legs, and a woman can do sitting down? Answer: "Shake hands."

They still talk about some men wearing corsets; but that's nothing—we know of lots of men who go to any extreme to get tight.

One Blairmore optimist (to pessimist)—"You are so pessimistic that you look in the death column for your name."

Square Shooter Witticisms

Silas Freeborn says that according to his understanding flirtation is attention without intention.

The Franco-Prussian war of 1870 was a love fest compared with the Franko-Blairmore war of 1900 to 1923.

O-what-a-dam-massian is a Russi.

Canadian Patriotism

"Make Canada a Country to Live In"

Here is a good slogan. Write it on your letters. Hang it in your dining room. Preach it from your pulpit. (Make Canada a Country to Live In). The statistic which facts when we talk of the need of immigration about this at us like the taunt of a demon at those whom their own sins have undone. Why should we need to fill our land with unsympathetic strangers while our own born Canadians leave their country without a twinge. How is this possible? Listen how love of the heather trembles everywhere on the exiled Highland pipes. Note with wonder how the Irish in New York are just for the light generation—often increasingly so as the imagination gets more and more inflamed. A Norwegian beside some perpetual glacier answers your question in easy English: "Where did he learn it? In Wisconsin. Why is he here? Homeless. Here we have an address on Canadian patriotism by Dr. Webster, Secretary in New Brunswick, delivered at Mount Allison University, in which he tells how the first reported Canadian found that way back from their varied exile to the one land that they loved. How different from the trapezoids that grow only to Boston now! Canada, he says, has lost during the past half century more than two million good citizens. How many of these have come back or even wanted to. Will millions of strangers, could we get them, make up for these? For this steady migration there are reasons in the nature of things. It is as much a part of the Scot's nature to "wish his fortune" at the world's end as it is to get a "drizzle in his eye" over Scotland's banks and braes. Do into the engine room of a steamboat on the Volga or on the transatlantic and you will find a Scotchman in command. Englishmen grumble—it is their privilege, about all the good places in England going to Scotsmen. There are more Scotsmen in London than in Edinburgh. Canada is like many a thing in the world, a length just a little north of the zone most congenial to energetic human existence, and there must ever be a trend of population toward the central line of greatest density. On this point there may be hope in the fact that civilization advances that lines moves to sterner climates. That which once passed through Rome and Athens and Babylon now passes through London, Berlin and Moscow. When we turn to questions of the future of Canada, the sterner climates that win the warmest attention—From the Montreal Witness.

Better Success With Small Farm

Duncan Marshall Would Favor Act Making It Impossible for a Man to Farm More Than 160 Acres

The dignity of farming as a profession, and making farming as a solution of some of the westerners' problems, were emphasized by Duncan Marshall, Commissioner of Agriculture for Canada, in addresses before the Fort William Canadian Club and Port Arthur Chamber of Commerce.

To overcome the practice of growing wheat alone on an exhaustive scale, whereby the gambling chances were taken, Mr. Marshall said he felt like favoring an act making it impossible for a man to farm more than 160 acres. The trouble with farming in Canada, he thought, lies in the fact that men are trying to farm too much land, and sometimes make a bad job of it. The reduction of farming lands would, he said, reduce wheat crops or farm produce, as it would tend to make the crops better.

To have success, he declared, a man must take the basis of good livestock as a starter. The man with poor stock is "just getting along."

Canada needs agricultural education, he said. The boy and girl of the country should be given the opportunity of studying agriculture in their daily school life. Salvation is promised, he believed, if boys and girls of farmers could be made to understand that it is a way and a life, and not a struggle. He did not consider it drudgery to take care of good livestock.

United Farmers Make Gain

A net gain of more than 4,000 members was registered by the United Farmers of Manitoba, during the past year, according to a statement made by the secretary at the annual convention. The membership, which had dropped to 11,402 at the end of 1921, had risen to 15,701 at the end of 1922.

"Every failure may be a step nearer to success."

There are now in France 1,300,000 more women than men.

The Drug Habit

The Evil Must Be Eradicated At Its Source

The death of Wallace Reid, well known movie star from the drug habit, is not only tragic in itself, but points to a serious menace not adequately met. Here is a young man of much accomplishment and great promise in his chosen field, whose life has been prematurely cut short. What stronger warning could there be against the use of drugs that so soon enchain and drag their victims down into misery and death?

The warning, however, goes beyond personal limits. Whole nations, in the east are honeycombed by this evil. China, for example, is a striking example of a degeneration that causes from the use of drugs more profound than that resulting from the drink habit. The present situation is reported to be extremely dangerous, and if the evil remains unchecked, it will surely make its way in great measure from east to west.

The drug evil must be scotched at its source, which is in the cultivation of the poppy and the manufacture of narcotics over wide areas. Dr. Wellington Koo, formerly Chinese Minister to the United States, at a meeting of the Council of the League of Nations maintained that the use of dangerous drugs could not be checked, so long as their production was allowed to be greater in excess of medical and scientific requirements.

No government has undertaken more severe restrictions against their use than the United States, but the drug evil is so far-reaching and insidious that no nation by itself can cope with it.

Putting entirely aside the political merits or demerits of the League of Nations, the fact remains that its health section has been remarkably effective in charting and attacking such world agencies as Asiatic cholera, typhus, relapsing fever, small pox, anthrax and scurvy. Like these diseases the drug evil calls for concerted action among the nations. It ought to be entirely possible as it is imperative, that the United States participate actively in the Opium Committee of the League of Nations. While this country hesitates, the drug evil becomes steadily more threatening than the avowed American realties. The Minneapolis Journal.

Cutting Brain Paths

Few People Realize Importance of Thinking Right Thoughts

The severe rainstorm was over. It had washed lanes and freshened the trees in the valley, and had also died to overflowing the little pools and low hills higher up, so that the water still came couring down the rocky hillside in rivulets. Someone lately remarked that they seemed to follow a path they found ready made for them. "They do," answered a neighbor earnestly. "That is the story of all such action-making paths; they make it easier for the one to follow. Certainly, it is the story of the thoughts that cut ruts in our brain."

We seldom think of these brain paths, and yet they are as real as they are important. Once admit a certain thought, and imagine it left in our neighborhood, conducted a distrust of something or someone to whom we have always believed, an ugly return that might be made to some unkindness, and give it space for a few minutes, and at a later opportunity we shall find it returning, and following the same course. Nevertheless, there is comfort in the knowledge that good, pure, generous thoughts have an equal power in cutting such channels, and we are not helpless in deciding which thoughts shall have the right of way.

Seeks Wireless Link to London

Australian Forecasts Conversation Between Widened Bounds of Empire

"Is that you, Australia?" This question over a telephone from London to the Antipodes is a possibility of the near future, so E. T. Flak, Managing Director of the Amalgamated Wireless Company Limited, told a meeting of the Royal Colonial Institute in London recently. Indeed, Mr. Flak said it was not only a possibility, but a probability, and he thought it might come to pass within three years. The day was approaching, he believed, when the human voice would be carried direct from there to Australia. He thought it would be done, at least experimentally, by before the year 1926.

Flat Lands Aid Eyesight

The best eyesight is possessed by those who live in a country that is flat and unbroken. An Eskimo can see a white fox against the snow at an incredible distance, and an Arab can name objects at a distance of five miles.

Palentine observes three Sabbaths. Friday is kept by the Moslems, Saturday by the Jews and Sunday by the Christians.

Whitely's—Cleveland Plain Dealer

Employee's Remarkable Record

Englishman Worked With One Firm For Seventy-Two Years

To die in harness at the age of 87 after having been for over 72 years in the service of the same firm—such was the proud record of the late Henry Cooper, of Clifton Road, in London, England. E. Bacon, the factory manager of the firm in question, Messrs. Holland, Adkins & Slater, of Foster Lane, Smithfield, London, gave some details of Mr. Cooper's remarkable record. "He came to us," explained Mr. Bacon, "when he was a little lad of 14, and stayed with us to the last. From the very first day he showed himself to be possessed of remarkably gifts of regularity and steadiness of temper. You could not rattle him, and from every standpoint he was a splendid workman and a real friend of the firm. To the very end he always came to smiling. In addition he was a non-smoker and a non-drinker, and these factors he attributed the fact that he had preserved all his faculties almost up to the day of his death. Moreover, he was hardly ever ill, and he found time to do his duty in the hobby of gardening and in being the secretary of the Silver Spoon and Forksmen's Society, whose books he kept in perfect condition. His work with us was that of a silver spoon and fork maker, and, being a well-read, well-educated man, and a good living man, as well as a thorough good workman, he simply laid himself down to rest and went to sleep when the end came."

Will Help Farmers

Movement Started to Aid in Building Feeders and Silos

A company is being formed at Winnipeg for the purpose of helping farmers financially when they are shown to be good credit risks. President W. P. Dutton announced at the closing session of the Western Rural Lumbermen's convention at Winnipeg.

Money would be advanced to farmers for the building of silos and feeders, and the money would be repaid when the farmers were shown to be good credit risks. President W. P. Dutton explained. The feeders would ultimately be shipped back to Winnipeg, and the farmer's note would be accepted as security and redemitted on the basis of 80 cents on the dollar. This money would be taken and loaned to other farmers, so that the company would be able in this way to loan five times what its capital was.

It was possible that a company doing business along that line might do more for Western Canada than all the voluntary and philanthropic efforts anyone could put forth, Mr. Dutton said.

Boleshevik Democracy

The official newspaper of the Soviet Government in Moscow, the present membership of the Communist party in Russia at 123,375. For purposes of government, constitutes the actual electorate for a country with a population in excess of 100,000,000. Such is democracy, according to the Russian model—Mantel Free Press.

Twelve British Field Marshals

There are now twelve British Field Marshals. They are the Duke of Connaught, Lord Grenfell, Lord Methuen, Earl of Ypres, Earl Haig, the Emperor of Japan, Marshal Foch, Lord Plumer, Viscount Allenby, Sir William Robertson, Sir Arthur Barrett and the King of the Belgians.

W. N. U. 1453

Crime and Athletics

Boys Engaged in Sport Have No Time to Get Into Mischiefs

A striking testimony to the important part played by athletics in the control of crime has been given by Judge John A. Jackson, of Leithbridge, who declared recently that 75 per cent of the prisoners who have come before him have been between 17 and 22 years old, and of this 75 per cent, fewer than one per cent had ever engaged in athletics.

That is not difficult to understand. Juvenile crime is usually the result of idleness, coupled with opportunity.

The boy who is busily engaged in baseball, or football, or hockey, or lacrosse, has no time to get into mischief.

Sports not only build up his body but they keep his mind clean and he is too much occupied with improving his batting eye, or learning to skate better, that he has no idle moments in which to even think about crime.

The boy who steals motor cars or some other piece of private property is not very often the boy who steals baseballs.

Time never hangs heavily on the hands of the young athlete. Indolence and sport do not go together, and the youngster who is interested in athletics has neither the time nor the opportunity to break the law. Sports keep him out of mischief, and by the time he has reached adult years he has the habit of good citizenship and never loses it.

This is why the Alberta Judge finds that not one boy in a hundred who comes before him has ever been actively engaged in sport.

Undoubtedly his evidence could be corroborated by local court officials.—From the Peterboro Examiner.

Trawler 'Catches' Mine

Fishing Crew in North Sea Receives Unpleasant Surprise

The fact that the North Sea is still a dangerous fishing ground was instanced when the North Shields trawler "Saxon" caught a mine, some seven miles S.W. of Bytham. The shipper of the trawler, J. W. Anderson, stated that at six o'clock in the morning, while hauling the crew felt an extra heavy weight in the net, and for an hour they endeavored to get this unusual object off board. The mine repeatedly bumped against the side, but as it was covered with fish the thought was so deduced as to give the impression that it was a barrel in the net. Having not the net well on board the crew received an unpleasant surprise on discovering that they had caught a mine. The skipper left the mine undisturbed in the net among the fish, and brought it into the trawler, where the coastguard towed it and rendered the mine harmless.

Since lawyers wear robes and wig in British courts, robbing robes are necessary. A woman lawyer's robbing robe has just been completed in the Royal Court of Justice. There's a full-length mirror in which the lady barristers can survey themselves.

"It costs 500,000 rubles to ride on a street car in Moscow." That is not all. The nation cannot find fault with the service without assuming the risk of being shot at sunrise.

Cork, iron and glass have been experimented with for making roads to stand heavy traffic.

Health Giving Properties of Milk

The Importance of Milk in Human Nutrition

To have great and extent happiness, usefulness and prosperity are dependent upon bodily health few of us are aware of the fact that we always appreciate how important it is that children in particular should be well nourished if they are to develop to their full physical and mental capacity. The cow has been aptly termed the mother of the world for the reason of the indispensable part played by milk and its products in human nutrition, and particularly in child nutrition. These are the facts, that Miss Helen G. Campbell, demonstrator and lecturer for the Dominion Dairy and Cold Storage Branch, is now actively engaged in bringing home to the people. The importance of milk and its products is the text of the various addresses she is delivering in different parts of the country at the present time. She recognizes as we all must do, the responsibility in this regard resting upon the school and the home. Taking for her subject, "The School Child and Nutrition," Miss Campbell recently delivered an inspiring address before the Teachers' Institute at Windsor, Ont., in which she showed on the evidence of several investigating scientists that, in the schools of this continent, from 17 per cent to 33-1-3 per cent of the children were sufficiently undernourished to require treatment for malnutrition, due chiefly to improper feeding. The only remedy, beyond the relative accompaniments of pure air, sanitary surroundings and exercise, is the consumption of good, body-building food. Milk and its products are among the foremost of these and are absolutely essential in abundant supply to the welfare of the child. Experiments and investigation have shown that their free use not only makes greater vigor of body, but also greater mental vigor and activity. Health officers and others whose experience enables them to speak with authority agree that almost without exception the milk-using children not only excel their school term in advance of the children who do not use it.

Measuring the Flow of Steam

Instrument Can Be Applied to a Number of Boilers

In a modern large power station everything from the boiler to the ash pit is carefully measured in order to ensure the highest economy. The instruments necessary for these purposes are in many cases rather expensive, and consequently their use is not frequent in the smaller plants. Nevertheless, economy is so important to a small plant as to a large one and there is therefore a wide field for accurate instruments at a cheap price. This demand has been very well met by a British firm in connection with the measurement of the flow of steam. It is of great interest to an engineer in charge to know exactly how much steam is flowing from his boiler and the instrument in question both indicates and records the flow of steam at an initial cost of less than thirty pounds. This instrument can rapidly be applied to a range of boilers so that each one may be indicated in turn, an arrangement which reduces the cost of the apparatus.

The Destiny of Canada

Canadians Are First Among the Strong Opposers of Earth

Addressing "the young men and women of McGill" a few days ago, Lord Bagg was told that he remembered after leaving the university that there is a country called Canada growing to nationhood, and that it can reach its real development only through the character of its people.

"Where are men ever to be happy, if not in Canada?" asked the Governor-General. "By whom shall they ever be taught to do right, if not by you? Are we not a race first among the strong ones of the earth, a race of the highest intrinsic qualities, capable of the greatest efforts for almost any cause?" The mood in us is incapable of weariness and unconquerable by grief. Have we not a history of which we can hardly think without becoming insolent in our just pride of it?

"Where shall it be if this country were to fall in the eyes of civilization? Yours and mine."

Lumbering in Port Arthur District

Lumbering in the Port Arthur District is being carried out on an extensive scale, according to reports. The season for 1922-23 will equal any previous year in output. Thousands of men have found employment in the numerous lumber camps, taking out pulpwood, ties, piling and cord wood.

Italy's plague is the old fly, which devastates the olive yards. In South-eastern Italy this insect has done \$25,000,000 worth of damage within the past twelve years.

Canada Collects Reparations

Claims Will Be Met Out of Property Held in Canada by Germany

Canada's reparations claims against Germany will eventually be made good out of the property held by Germans in Canada. If Germany does not pay, declared Thomas Mulvey, Under-Secretary of State for Canada, in addressing a large gathering in Toronto on the questions discussed by the economic conference of nations in London.

Mr. Mulvey first described the functions of the conference and proceeded to give some interesting details of the system showing how the debts are paid between the Germans and the Canadians. "In case there is a balance on any transaction in favor of the Germans, this is immediately applied to the account of reparations. The amount of German property taken over during the war in Canada represents, he said, a value of approximately \$35,000,000. This included some 140,000 shares of C.P.R. stock and kindred securities. The exact value was difficult to fix, he said. Investigation, however, had resulted in the return of 48,000 shares of C.P.R. to people who were found to be neutrals.

The Canadian claims for reparation against Germany, Mr. Mulvey said, represented about \$25,000,000 and about \$20,000,000 in claims. The claims against Germany under the terms of the armistice were confined to the damage sustained by civilians, including claims for loss of falling ships sunk, loss by deaths and disabilities in the sinking of the Lusitania and the Hispania and for damage done by bombs. These are among the claims a number made by Canadians for injury received in air raids in England.

Germany, he said, had defaulted in her payments and these could be made good out of the property held by Germans in Canada and this would eventually be done if Germany did not pay.

A Chinese King

Chin Gee Worshipped by Peasants of Southern China

Thirty years ago Chin Gee Hee was a humble storekeeper in Seattle, who probably spent much of his life wondering where his name would come from. Today he is "King of Southern China."

And it is all because, according to his own story, he died when he was forty-six and was sent back from heaven to live a more exalted existence than he previously had spent.

There is a big bronze statue at Sunning as a perpetual reminder that Chin Gee did his duty when he came back to earth. He built a railway from Kongsun to Sunning in Southern China, and in the case of the peasants of that country Mr. Chin is something more than a mere story-book saint.

He is seventy-six now, but he claims that during his brief sojourn in heaven he was told that he would live 104 years. Just how long he lived in Seattle not even Chin Gee remembers exactly, but he still possesses an illuminated address presented to him by the Seattle Chamber of Commerce when he was in Seattle, he also lost most of it and when he returned to China he had to sell his home to pay his employees.

After that, at the age of forty-six, Chin Gee "died." That, at any rate, he declared, was the positive fact. In heaven, he says, they told him they were not ready for him and they suggested that he return and build the Kongsun railroad. Chin took the hint and shortly afterwards "resurrection" he became surprisingly prosperous and successful. The building of the railroad was only one of his achievements.

He prefers kings to presidents, declaring to the interviewer, "Presidents are no good. Americans kill three presidents. People like king all same England. See Prince of Wales walk all over earth and no one shoot him."

His idea for the economic salvation of the Chinese people is that the country should contribute on the basis of one dollar a head, the rich paying enough to make up the shortage of money from the poorer classes.

Canadian Trade Treaties

Following the signing of a trade treaty with France, Canadian ministers abroad have concluded a similar advantageous treaty with Italy and arranged for a six months modus vivendi with Spain at the end of which a similar treaty will be concluded. It has likewise been arranged that when Belgium establishes a favored nation tariff Canada will get the benefit of it.

Life is surely a game of chance, and fate seems to have tracked the cards against most of us.

Some people would grow along the weather if it rained silver dollars.

Corporation of Town of Blaimore By-Law No. 80

WHEREAS the Municipality of the Town of Blaimore is engaged in the business of supplying electricity for power and lighting purposes to the inhabitants of said Town, and it is expedient to pass the following by-law:

Therefore, the Council of the said Town of Blaimore hereby enacts as follows:

1. The said Electric Light Superintendent is hereby appointed electric light superintendent of the said Town for the purpose of carrying on the said business of supplying electricity for power and light to the inhabitants of said Town.

2. The said Electric Light Superintendent shall receive a salary of \$1,000 per annum.

3. The said Electric Light Superintendent is hereby authorized to enter on behalf of the Town, in his own name, into all necessary contracts for carrying on the said business, other than contracts with any persons to supply electricity to the Town.

4. All contracts entered into by the Electric Light Superintendent for supplying electric power or light shall be subject to the following terms:

ELECTRIC POWER

(a) Current for electric power shall be designated by the unit "H.P." with the numeral to indicate the number of units.

(b) The price for electric power shall be seven cents for the first 500 k. w. h., and five cents for each additional 500 k. w. h. or part thereof.

(c) Each consumer of electric current for power must have a separate meter in his power current.

(d) If the consumer has his own transformer, he shall be allowed a discount of 5 per cent on all accounts if paid within seven days from date thereof.

(e) There shall be a minimum charge of \$2.00 per h.p. per month net.

(f) All consumers of electric current for power will be furnished transformers by the Town at cost, with an additional 10 per cent to cover handling expenses. All transformers shall be always at consumer's risk after purchase thereof.

ELECTRIC LIGHT

(g) The price for electric current for light shall be ten cents per k. w. h.

(h) There shall be a minimum charge for electric light of \$1.00 per month net.

(i) The price for current for advertising signs, if on power circuit, shall be seven cents per k. w. h.

(j) The price for street lighting and Town Departments shall be five cents per k. w. h.

(k) No person shall use electric current for light or power until said person shall have paid at the Town Clerk's Office a deposit of \$5.00 for power and \$2.00 for light, as the case may be.

(l) A person moving from one building to another will not be connected up unless all arrears are paid.

(m) Notice must be given at the Town Clerk's Office within 24 hours after premises have been vacated by a consumer of electric current.

(n) Light and power will be cut off at any time, without notice when a consumer is in arrears for 30 days after his account has been delivered to him personally or left at his usual place of business, or mailed to him at his last known address.

(o) A fat charge of \$2.00 will be made for connecting up the premises of a consumer who has been cut off for non-payment of account, or a new connection, or where a meter is required.

Done and passed in open Council this sixteenth day of February, A.D. 1923.

A. McLEOD, Mayor.
F. WRIGHT, Secretary-Treasurer.

ALBERTA'S DRUG TRAFFIC

Alberta has not as much reason to be alarmed about the drug traffic as some other provinces, according to figures produced by the federal department of health at Ottawa, in this province stands far down the list of the provinces as for as the number of registered drug addicts is concerned. Quebec tops the list with 3360 registered addicts, British Columbia has 2250, Ontario 1800, Manitoba 500, Alberta only 550. Saskatchewan and New Brunswick each have 270, and Nova Scotia 20. Prince Edward Island has none.

MAKING MISTAKES

We made a mistake in our last issue. A good friend of ours—a subscriber—who owes us for four years' subscription—told us about it. The same day there was a letter in our postoffice box that didn't belong to us. We called for 95 over the phone and got 198. We asked for post No. 56, thread and when we got home we found it was No. 60. The train was reported 30 minutes late. We arrived at the depot 20 minutes after train time and found the train had gone. We got our milk bill and there was a mistake of ten cents in our favor. We felt sick and the doctor said we were eating too much meat—and we hadn't eaten meat for two months. The garage man said the Jney was a nice car, because it needed a timer. It cleaned a spark plug and found it Jney was there. Yes, friends, we made a mistake in our last week's issue.—E.S.

A hosiery manufacturer, advertising footwear for men, says: "The quality number is on each sock. The scriptural injunction—'as ye sowed, so shall ye reap'—is on the heel of each sock."

PRESBYTERIAN STAND

—ON UNION

Toronto, January 26, 1923.
To the Editor,

Sirs:—That in facts regarding the policy of the Presbyterian Church of Canada may be accurately known by the public, this committee respectfully asks you to publish this letter as its official statement on the subject.

It has been suggested that there is some difference of opinion as to the Church's position on the Union question. Let the General Assembly speak for itself. In 1916 the Assembly by a vote of about four to one expressed its mind as follows:

1. That in accordance with the recommendations of the General Assembly of the Presbyterian Church of Canada do now resolve to unite with the Methodist Church of Canada and the Congregational churches of Canada to constitute the "United Church of Canada."

2. That a committee be appointed to carry out the policy of the Assembly.

In 1921 at Toronto, the General Assembly again expressed its mind by a vote of four to one in the following terms:

1. "Be it resolved that this General Assembly take such steps as may be best to consummate Organic Union with the Methodist and Congregational Churches of Canada, as expressed by its constitution."

2. That a representative committee be appointed with instructions to confer with negotiating churches as to carry out the policy of the Assembly and to report to the next Assembly.

We submit the above facts that in fact-minded person the policy of the Presbyterian Church, as expressed by its supreme court, is perfectly clear and unambiguous.

It has been contended that the presence of anti-unionists on the Assembly's Union Committee indicated that it was not intended to definitely promote the Union. In answer to this contention, permit us to state that these anti-unionists were appointed as a result of a specific request from the leaders of the anti-union section of the Assembly. This was agreed to by the Unionists in a spirit of conciliation.

Ralph Connor, author of "The Ski Pilot," "The Man From Glengarry," and many other popular novels dealing with the life of Canada, may be said to be a dual personality, in that he is also the Rev. C. W. Gordon, D.D., minister of St. Stephen's Presbyterian church, Winnipeg, and ex-Moderator of the Presbyterian General Assembly, but he has no two opinions on the question of Church Union. In the course of a recent interview the preacher-novelist emphatically declared himself as opposed to further delay in the consummation of the Union.

"The interests at stake are so vast and pressing that the Christian church cannot afford to pause for a single day, merely for the sake of pausing or because of any hope that we may have of winning those opposed to Union to share our convictions," said Dr. Gordon.

"We shall have to expect that a number of brethren will be unable to see their way to move into the Union just now, but no amount of delay will change their convictions or attitude," he continued. "I feel that the delay of this great movement for Christian unity in Canada is trifling with interests so serious and inviting disaster so great that I could not accept responsibility for advising delay."

"Speaking of the situation in the West, with which he is so familiar Dr. Gordon said: 'There is no doubt in my mind that as far as Western Canada is concerned, Church Union is practically accomplished, and nothing that I can imagine will prevent its formal and complete consummation. Very few indeed will be the Presbyterian congregations in the West that will remain outside the Union Church.'

Dr. Gordon believed that the alignment and mobilization of the Christian forces of Canada by Church Union will do more than anything else to advance the cause of true religion

MUNICIPAL HOSPITALS

SUCCESSFUL

There are thirteen municipal hospitals operating in the province now with 267 beds and the financial condition of all these hospitals is said to be splendid.

Infants is making application to be organized as a 'hospital' district and the city of Red Deer has under discussion an application to organize the city into a municipal hospital district.

There is a rather unique scheme in operation at the Onowas hospital where the board engaged the services of a physician as medical superintendent of the hospital and in that hospital all medical, surgical and hospital service is provided at the hospital at the minimum rate and the hospital has been able to operate on that basis to financial satisfaction.

AMUSEMENT TAX REVENUE

A falling off of attendance at theatres and places of amusement during 1922 as compared with 1921, is indicated by the fact that the receipts from amusement tax for 1922 were slightly over those of 1921, in spite of the fact that the amusement tax has been increased. In 1921 there were 218 theatres, and in 1922 only 202. The amount of tax collected on the increased rate in 1922 was \$182,726.00 as compared with \$181,102 in 1921.

Compenses organized in the province in 1922 totalled 257 compared with 260 the year before, and increase in fees dropped from \$38,240 in 1921 to \$36,670 in 1922.

DON'TS FOR DANCERS

By "Cutes"

Don't be afraid to step on your partner's foot; she'll always say "M. aut!" when you mention it—if you think it worth while.

Don't apologize immediately you bump into another couple. Give them a first chance.

Don't angle for compliments by telling your partner you don't know how to dance this dance very well, if you're dancing badly she'll know it, if it's hardly worth mentioning.

Don't imagine that the odor of 'peppermint' is anything more than a 'give-away'; anyhow, the combination is fierce.

Don't imagine that champing your jaws on a wad of gum adds anything to your grace of movement. It only makes you look like a goldfish gulping ants' eggs, and that's no compliment to the poor fish either!

Don't "park cheeks" with your partner, especially if she happens to be taller than you—unless you are attempting a tableaux, "madonna and child"—it may look cute—but—

Don't behave as if her consent to dance with you carries with it a license to a wrestling contest.

Don't sing, while dancing, unless you are dancing so badly that the addition of your voice is necessary as a counter-irritant.

Don't wait till the dance is half over before you take the floor with your partner; the girls are there to dance, not to give you a chance to finish your smoke with the boys out of order.

And remember:
The singing and the dancing,
The laughter and the fun,
The wooing and romancing
Are over soon and done.
The flirting and the courting,
The frolicking and play,
The revel and the sporting
Endure but for a day.

Mrs. Catherine K. Mortiboy, of Seattle, daughter of A. Kramer, of Coal Dale, is said to have been left an estate in England valued at \$750,000.

among the people. "The preservation of this church, or that church this name or that name, is so utterly insignificant that it sinks out of sight," said Dr. Gordon.

Signed on behalf of The Presbyterian Church-Union Movement Committee by

J. H. TURNBULL

PRESENTATION TO SERGEANT

S. H. KISTRUCK

Prince Albert, Daily Herald, January 12.—An interesting ceremony took place at Prince Albert divisional headquarters of the Saskatchewan provincial police last night, when Patrol Sergeant S. H. Kistruck, who is retiring from the force on January 15th, was presented with a solid gold watch, suitably engraved, the gift of Prince Albert division of the provincial police.

The presentation was made by Inspector R. H. Tait, officer commanding the division, who referred to the five years of excellent service the retiring officer had given in the force, while a member of the headquarters staff, and also when at Maitland, Shellbrook and Melfort detachments. Sgt. Kistruck leaves shortly for the State of Washington, where he will make his home in the future.

[Sergeant Kistruck above referred to was for a time stationed in Blaimore as corporal in charge of the Blaimore detachment of the R.C.M.P.]

A. Link has opened up a temporary office in the building recently vacated by the Union Bank of Canada. Red Assalqua is occupying the vault in the same building.

THE PASS FOURTEEN YEARS

AGO

(From Frank Paper, 1909.)

July 30.—Dr. A. J. Bechtel, of Lille, will no longer be able to practice medicine in Alberta, if the finding of the committee of discipline of the College of Physicians and Surgeons is upheld by the college. Dr. Bechtel was charged with unprofessional conduct as was found guilty. The committee was composed of Drs. Kennedy, McLeod, Mcburn, of Lethbridge; Simpson, of Lacombe and Hodson, of Strathcona. The principal witnesses were Mike Joyce, of Erie, prominent in miners union circles, who testified that Dr. Bechtel endeavored to induce him to use his influence with the miners of Coleman to have Dr. Westwood ousted and give him (Bechtel) the contract, for which he agreed to pay liberally.

Sergeant Haslet went to Macleod on Wednesday to appear at the trial of "Hippo" Johnson, the noted stock thief, who had his trial that day and was sentenced to four years in the penitentiary.

Fred Wolstenholme has purchased the business of the Great West Fuel & Trading Company and has taken charge. He will handle all kinds of building materials, iron, steel and fuel, and as he is a hustler will doubtless make a success of the undertaking.

Dr. Malcolmson left yesterday for Lethbridge with Gordon Steeves, to consult with Dr. Mcburn and examine Gordon's arm with the X-ray. A telegram received this morning states that it was necessary to re-set the bone and summoned Mrs. Steeves to Lethbridge.

The Hillcrest mine established another output record on Monday, when shipments amounted to 897 tons.

The newest newspaper to make its appearance in the Crown's West Pass is the Hosmer Times. The Times is made by Bert Whimster, brother of Keith Whimster, formerly of Frank, and is a most creditable publication in every respect.

F. O. Adams, of Spokane, who is interested in the Carbon Hill coal property in the South Fork, arrived in Frank the early part of the week. He is putting on a crew of men to open on the seams and prepare the holding for an examination.

Dr. Malcolmson, chairman of the village council, is in receipt of a communication from the chief game warden of the province, discouraging the idea of villages and towns declaring a civic holiday on the opening of the duck season, for the reason, as he states, that such holidays inevitably result in wanton destruction of game birds. No such holiday will be declared here, the doctor announces.

BLAIRMORE CURLING CLUB

The first competition in the bonspiel is now down to the semi-finals and at the stage Morgan plays McDougall and Clark plays Wilson. Morgan and Wilson are now the only undefeated rinks in the bonspiel.

The finals have now been reached in the other competitions and will be played off soon. In the Charbonnier Cup McLeod plays O'Neill. In the Upton Trophy Mackenzie plays Oliver and in the Morgan Cup Wilson plays McLeod.

On Friday last Coleman sent two rinks for the Burns Cup but were defeated by a total of 9 points, Whip Pincher Creek were defeated last night by a total of 14 points. The successful Blairmore rinks who are defending the Cup are A. J. Kelly, J. Jenkins, Dr. J. W. Key and J. E. McLeod, skip; J. H. Farmer, J. P. O'Neill, W. Bird and D. G. Mackenzie.

The Coleman bonspiel was postponed from Wednesday last to Wednesday, February 22nd, and entries should be made to Mr. J. B. Wilson, secretary, Union Bank, as soon as possible.

The number of students obtaining loans in 1919 was 145, in 1920 was 242, in 1921 was 305 and in 1922 was 661. The amounts due in repayments by students in 1922 were \$82,500.50. The amount collected in 1920 was \$13,291.50, in 1921 was \$49,366.93 and in 1922 was \$63,700.41. In 1919 the total enrolment in both sessions was 467, in 1919 it was 600, in 1920 it was 715, and in 1921 it was 1046, while in 1922 it had risen to 1646 for the two terms.

A return was laid on the table for Dr. State regarding the cost of the public health and district nursing service.

Mr. Dechene was given a return respecting amounts collected from insurance companies for administration of the fire prevention act. Mr. Dechene was also given a return respecting the number of civil servants retired since January 1, 1922 and the number added to the service. Mr. Dechene also got a return respecting the employment of Mr. W. J. Jackson, and one respecting the employment of Dr. Walter Scott, legislative counsel. Mr. Daven was given a return respecting the cost of issuing weekly news bulletins and a return respecting the special audit. Mr. Marshall got a return respecting the number of livestock purchased for public institutions by the department of agriculture. Mr. Mills got a return respecting the Lacombe and Northwestern Railway, and one regarding lands forfeited under the tax enforcement procedure. Mr. McLeod got a return respecting the cost of the grasshopper campaign. Mr. Pearson was given a return showing the inspector's reports on private schools. Mr. Cole was given a return with respect to loans to school districts. Mr. Cole was also given a return as to credit and debts of each municipal unit, and as to expenditures on highways, and bridges.

Wednesday being Ash Wednesday, the session was adjourned. On Thursday, the debate on the wheat board resolution was brought to a conclusion and that on the matter of grain enquiry opened.

On Thursday, G. A. Forster asked for a return respecting the amounts collected and disbursed under the workmen's compensation act. Mr. Mitchell asked for a return on amounts paid in municipal or improvement districts for medical services for indigents and others. Mr. Mitchell also asked for a return respecting convictions under the domestic animals act, and another respecting the proposal made last year that members on the government side of the house were to form committees to study the various government departments. Mr. Cole asked for a return respecting taxes and exemptions on C. P. R. lands, also with respect to the amounts collected under the 1922 mine owners tax, and another respecting the number of ministers and officials travelling outside the province on government business during the past year, and expenses of such trips.

BAFFLES OFFICIAL GUARDIANS

REGINA. — Cumming approaching genius has recently been displayed by a girl termed "an outlaw," by E. J. Reynolds, child protection commissioner. Locked doors mean nothing to this girl, whose general mentality is conceded subnormal. The first name is Mary. Her last name was not disclosed.

Mary was brought to Regina some years ago and was placed in the home for mental defects. At that time she was about 12 years old. She was very unruly and exercised a bad influence on the other girls, so Mr. Reynolds had her placed in a Winnipeg reform school, that is known to exercise firm discipline over its inmates.

Nothing was heard of Mary by Mr. Reynolds until a short time ago, he received a telegram from Winnipeg telling him to take her away at once as they could not keep her any longer.

Mrs. Dredge Jones, inspector of foster homes, was immediately sent to Winnipeg. When she arrived there she found that Mary had been too unruly for the Winnipeg authorities.

She had refused to do what she was told and exercised a demoralizing influence on the discipline of the school. About a month ago the matron of the home noticed that someone was entering the rooms of the other children at night and throwing the pictures from the walls and breaking anything breakable.

A little investigation disclosed that Mary was the offender. She was taken to task and all the doors were locked at night. That did not stop the midnight depredations for the next night the rooms were entered again. Mary was searched and her room was searched but no trace could be found of a key.

The following night the same thing occurred. Another search of Mary's room revealed that the bedsprings had been broken and some of the wire taken away. The secret was out. Mary had been making her keys of the wire in the springs.

As a preventive punishment Mary's bedstead and springs were taken from her and she was forced to sleep in blankets on the floor. Soon afterward the matron found that the rooms had been entered again. Another search revealed that the electric light fixtures in Mary's room had been used to improvise a key.

That was the last straw. The officials of the home gave up and wired Mr. Reynolds to take her back. Mrs. Jones accompanied Mary to Weyburn Mental Hospital where she will be kept in future.

BEAUTIFUL ODE TO A PIG

As near as I remember, it was late in last December, I was strolling down the street in midday pride.

With my heart all in a flutter, I lay down in the gutter.

An pig came up and lay down by my side.

While I lay there in the gutter, With my heart all in a flutter,

A lady passing by was heard to say "You can tell a man that boozes."

By the company he chooses, An pig got up and slowly walked away.

Wade nodded. Ten minutes later he was in the saddle and headed for the mountains, just as dusk began to fall. The cool night air, blowing against his face as he reached the higher levels, was delightfully refreshing after the heat of the day. He took off his hat and opened the neck of his shirt to the breeze, which revived his energies like wine. He knew that as he felt, so his horse felt, and he was glad, for the animal would have to make a fast, hard trip. At the crest of the first hill, before dipping into the valley, he turned for an instant in his saddle to look backward over his trail toward the twinkling lights of Cravling Water in the distance below.

He had covered some five miles of his journey, to no other sound than the occasional note of some bird, when his quick ears caught the thud of a horse's feet on the trail ahead, with now and then a sharp clatter as the animal slipped on the stones. Wade slowed his horse down to a walk, and eased his Colt in his holster. He expected to find a different person now, waylaid, but under the circumstances, it was just as well to be prepared for trouble. Soon, however, he stilled himself, for whoever rode toward him, made too much noise for

HELP FOR YOUNG WOMEN

Mrs. Holmberg Tells How Lydia E. Pinkham's Vegetable Compound Helped Her

Viking, Alta.—"From the time I was 16 years old I would get such sick feelings in the lower part of my abdomen, followed by cramps and vomiting. This kept me from my work (I help my parents on the farm) as I usually had to go to bed for the rest of the day. Or at times I would have to walk the floor. I suffered in this way until a friend introduced me to try Lydia E. Pinkham's Vegetable Compound. I have had very satisfactory results so far and am recommending the Vegetable Compound to my friends. I am sure I am glad I tried it for I feel like a different person now that I don't have those troubles."
—OUIDA HOLMBERG, Box 38, Viking, Alta.
Letters like this establish the merit of Lydia E. Pinkham's Vegetable Compound. They tell of the relief from such pains and ailments after taking it.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotics or harmful drugs, and today holds the record of being the most successful remedy for female ills in this country. Write for list of voluntary testimonials proving this fact.

If you doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for Mrs. Pinkham's private text-book and learn more about it.

any but a powerful mission. The other horse, too, had been shoved down and the two riders approached each other with such caution that the rancher finally became impatient and pressed forward recklessly.

Out of the night the stranger came on, still slowly, until a turn in the trail brought them face to face. "Don't shoot!" said a woman's contralto. "I'm a friend."

"Dorothy!" Wade ejaculated, at once recognizing the voice, although he could not see the girl distinctly in the darkness. In Heaven's name, what are you doing out here?"

"It is a question," in her relief, she laughed softly as she pulled her pony up side of him. "I was a little scared for a second or two. I've awfully bad news, I'm afraid," she added, immediately serious. "I've been trying to find you. I went to the hotel and they told me you'd gone somewhere."

"Miss Rexhill and I went to call on you."

"You did? If I'd only known. I've been clear out to the ranch."

"Is Santry there?" In his anxiety he forgot momentarily the loneliness of her long ride. "They say some of Jensen's men have been shot up; and I'm anxious to find out what Bill knows."

"That's just what I want to tell you. I heard of the shooting before I left town. Whoa, Gypsy!" She reined up her pony, for it would not stand still. Wade seized the animal's bridle and quieted it. "I don't know if he's there or not," the girl went on. "I couldn't see. The ranch house is full of men."

"Men? What men?" Wade demanded sharply.

"Rance Moran's crowd. They went out to arrest Santry. The sheriff is with them. I heard part of it in town, and that's why I tried to find you." Wade groaned. "I peeped in at a window, and when I could see neither you nor Santry I slipped away without being seen and took the old trail back because it was shorter."

"Lord, what a mess!" Wade ground his teeth savagely. "Poor old Bill was all alone there and they must have surprised him. But I don't see why Barker didn't mention the posse when he told me of the shooting."

"He didn't know of it, probably. They left town very quietly. I happened to be out back of the house and I heard one of them talking as they rode by."

"Good Lord!" Wade's head dropped. "I told Bill to stay at the ranch, and he promised me. 'I don't believe I shot Jensen at all,' Dorothy declared, with spirit. 'Yes, it was Jensen himself and one of his henchmen. Both in the back—killed.'"

"Bill Santry never shot any man in the back," Wade declared in a relieved tone. "If you're sure of the facts, Santry will come clear all right."

"It's just a devilish scheme of Moran's, that's all, to put it on you and Santry. I'm sure it is. He hates you both. Wade, on the way out, he told the little man in again. 'No, it's all right, Gordon. I can manage her,' she reiterated, as he reached for the bridle once more."

"So that's their game, eh? By Heaven, I more than half believe you're right." His face grew ugly with rage. "Dorothy," he continued firmly, "thanks are useless. You're a brick, that's all. Do one thing more for us, will you?"

"Anything," she replied simply, her eyes shining with devotion to him, but he was too overwrought to read them in the darkness.

"When you get back to town get word to some of the men for me. You may meet them on the way out. If not they'll be around the barn. Tell them to meet me at the big pine, on the crest of the first hill."

His horse had grown restless and he now allowed it to rear its head; he was snorting, and part her when she clutched his arm.

"Gordon!" She held him dearly, too dearly to let him know how well until he should speak, if he ever did speak; but above all, she was sure of him. "You're a brick, that's all. Do one thing more for us, will you?"

"Anything," she replied simply, her eyes shining with devotion to him, but he was too overwrought to read them in the darkness.

Livestock Judging Competition

Macdonald Competition Open to Agricultural Colleges of Western Canada

Every Provincial Agricultural College west of the Great Lakes has been invited to participate in the 1923 Macdonald Livestock Judging Competition. This is an elimination contest, arranged by the firm of W. C. Macdonald, Reg'd. Inc., Tobacco Manufacturers, of Montreal, to determine which college will be represented by its student judging team at the Chicago International Livestock Show.

The winning team will be sent to Chicago as the guests of the local tobacco firm to represent "Western Canada" in the International competition which is the premier event of its kind on the American continent.

Western Canada went unrepresented by any college team and the House of Macdonald, so prominently connected with the development of scientific agriculture in Canada for so many years, has generously offered and arranged for adequate representation of Western Canada if the agricultural college desire to have their students participate.

To properly represent the great Canadian west at Chicago, it was decided to have the most representative team possible and the elimination contest is therefore being arranged in order that the best team may be selected.

The agricultural colleges of British Columbia, Alberta, Saskatchewan and Manitoba have been invited to enter teams of five students, from their final year, in the Macdonald Livestock Judging Competition.

The western college authorities will decide themselves where the competition will be held but the Royal Agricultural Show at Toronto, to be held next November, is favored for a number of reasons.

In the event of the Toronto show being decided on, the firm of W. C. Macdonald Reg'd. Inc. will pay the railway expenses of the teams of five and an instructor from all the western colleges to Toronto and return.

The rules of the contest are that the list of all competing teams must be eligible for entrance to the student judging competition at the Chicago International Livestock Show, and that the entrance fee for this (Chicago) competition must be looked after by the authorities belonging to the University or College of the winning team.

After the elimination contest is decided all expenses of the winning team to Chicago and return to the college will be paid by the donors of the Macdonald Challenge Trophy.

One of the most interesting of the New Year's honors in England is the knighthood bestowed upon Bernard Spilsbury, the honorary pathologist to the Home Office, who for the past twelve years has been almost continuously engaged in helping in the detection of crime. During this period he has made thousands of post-mortems, and he has figured as a witness in almost every important murder case that has come to trial. No other man has solved more mysteries of crime than Sir Bernard Spilsbury, who investigated, among other cases, that of George Smith, who drowned three successive wives in baths, the Crippen affair, and the comparatively recent Armstrong poisoning case in Hay, Breconshire. Nowadays he is seen a little less frequently in the courts than formerly, for he is devoting more of his time to hospital and research work.

A cubic foot of gold weighs 1,202 pounds.

Aviators Plan World Trip

Five French Planes Start Trip Around the World

Five French airplanes, flying under the patronage of the Government, will leave early in March for a trip around the world. The aviators plan to divide their long journey into a series of short flights, participating in exhibitions and competitions along the way.

Their course will take them through Italy, Algeria, Egypt, Syria, Mesopotamia, Persia, India, Siam, Indo-China, Korea, Japan and the United States. They will then fly south across Central and South America, crossing back to Africa and returning to France by way of Spain.

Will Return Medals

A strong protest was made recently at a large meeting of ex-servicemen of the British army and navy against the employment of non-servicemen in the civil service of the Union of South Africa to the exclusion of the war veterans. It was decided by the veterans to return all their service medals, including Victoria Crosses and Military Medals to Premier Boshoff of South Africa.

Think only of yourself and others will cheerfully forget you.

A Spiral Chimney

British Engineer Solves Problem of High Chimneys Capable of Withstanding Wind Pressure

A British aeroplane engineer has built a spiral chimney in such a way that it presents a corner to winds from any direction. This is an attempt to solve the engineering problem of building tall chimneys to withstand the tremendous pressure of winds at high velocity.

Each brick at the corners is displaced one sixteenth of an inch, so that the chimney forms a spiral. As a result, each corner at the top of the stack is directly above the middle of one side of the base. Thus, the thrust of a wind is distributed over two sides of the chimney, instead of being concentrated on one side, and this walls will withstand a wind pressure that might demolish the chimney if the sides were flat. A spiral chimney can be built without added expense.

Men Must Obey Women

The Roman Catholic Bishop of Southwark, Rt. Rev. Peter E. Amigo, has issued a pastoral letter condemning the careless quest for pleasure.

William S. Tudor, who superintended and installed the first automatic fire alarm in Canada, died at Montreal in his 87th year.

Harry Leader, Progressive Member of Parliament for the Prairie, wants the Government, the House of Commons and the Senate to set the country a lesson in economy by reducing salaries and indemnities by 12½ per cent.

"Information reaching the Labor Department," said Hon. James M. McDuff, Minister of Labor, "does not suggest the need of more mechanics for the Dominion at large."

The sum of \$23,000, the residue from the Knights of Columbus "Army Hut" fund during the war, will be used in hospital work for veterans whose illness is of such a nature as to put them outside statistics.

The Government at Vladivostok has stopped the deportation of "white" officers and soldiers to Russia as a result of the aroused public opinion against the alleged mistreatment of large numbers of deportees.

Capital invested in printing trades in Canada, in 1929, according to a return issued by the Bureau of Statistics, Ottawa, was \$76,610,961. Salaries paid totalled \$136,097 and wages, \$2,952,000.

The first Indian woman to qualify as a barrister, is Miss Mitham Taha. She is a B.A. of Bombay University, and a Parson girl who went to London in 1919 to further the cause of the franchise of Indian women. She has been to be placed at the Indian Bar.

New regulations for the Canadian Naval Reserve provide for a force of 500 officers and men. The enrolment will be for five consecutive years, with re-enrolment for similar terms up to 25 years. The age limits are from 18 to 35 for first entry.

RUN-FAST, NERVOUS? Weak Women can Find the Help They Need

St. Thomas, Ont.—Dr. Pierce's Favorite Prescription medicine for women who are at the crossroads of nervousness or run-down, or who suffer with womanly ailments. I have not only taken it myself and been benefited, but I have known of many other women who have been benefited, and in no case have I ever been at the crossroads of nervousness or run-down, or who suffer with womanly ailments.

The use of Dr. Pierce's Favorite Prescription makes women happy by making them healthy. A great many women in every part of Canada owe their good health of today to this famous Prescription.

HAVE YOU STOMACH TROUBLE? This Woman Had It—Great Discomfort and Given Her Experience. Dundalk, Ont.—"I am only too glad to tell what Dr. Pierce's Golden Medical Discovery has done for me. I doctored three months and got no relief, but, thanks to Dr. Pierce's medicine, I found a cure at last. I will recommend it to any poor sufferer with ulcerated stomach and mouth. When I started taking the 'Discovery' I weighed 85 pounds; now I weigh 110. No other medicine has done for me."—Mrs. Malcolm McLaren.

You can quickly put yourself in A1 condition by going to your drug dealer and obtaining Dr. Pierce's Golden Medical Discovery in tablets or liquid, or send to Dr. Pierce's Laboratory in Bridgeport, Ont. for trial pkg. and write for free medical advice.

Rheumatic Pains Are relieved in a few days by taking 30 drops of Keller's Syrup after meals and on retiring. It dissolves the lime and acid accumulations in the muscles and joints so these deposits can be expelled, thus relieving pain and soreness. Keller's Syrup is known as "Extract of Roots," contains no drugs or other strong drugs to kill or maim, the pain of rheumatism or lumbago; it removes the cause, 50c and \$1.00 bottles at druggists.

Voyage of Adventure

Schooner Fitted Out For Scientific Research Will Sail From London

A 2,000-ton schooner is being fitted out for a ten months voyage of adventure and research in little known parts of the world, by the Scientific Expeditionary Research Association, an English Association of scientists of all classes. The vessel probably will sail from London in July. She will take passengers, and already the applications are in excess of this number.

From London the tentative route is to the Canary Islands, Isthmus of Panama, Galapagos Islands, Easter Island, then westward to a series of islands within the tropics, and back through the Panama Canal.

GENERAL DEBILITY FOLLOWS INFLUENZA

The After Effects Often More Serious Than the Disease Itself

No reasonable precaution to avert an attack of influenza should be spared. The disease itself often proves fatal and its after effects among those who are spared is the life of a victim of almost constant misery. Ask almost any of those who have been attacked by influenza and you will find their present condition of health is and most of them will answer: "Since I had the influenza, I have never been fully well." This trouble leaves behind it a persistent weakness of the lungs, shortness of breath, bad digestion, palpitation of the heart, and a tired feeling after even slight exertion. This is due to the blood-poisoned condition in which the patient is left after the fever and influenza have subsided. This condition will continue until the blood is pure and the nerves are strengthened.

The sum of \$23,000, the residue from the Knights of Columbus "Army Hut" fund during the war, will be used in hospital work for veterans whose illness is of such a nature as to put them outside statistics.

The Government at Vladivostok has stopped the deportation of "white" officers and soldiers to Russia as a result of the aroused public opinion against the alleged mistreatment of large numbers of deportees.

Capital invested in printing trades in Canada, in 1929, according to a return issued by the Bureau of Statistics, Ottawa, was \$76,610,961. Salaries paid totalled \$136,097 and wages, \$2,952,000.

A Navy Memorial

Belgian King Will Lay Foundation Stone at Zebrugge Mole

The work of restoring Zebrugge harbor has been quickened within the past month or two, in readiness for the laying by the King of the Belgians, early in April, of the foundation stone of the memorial to the ratings of the Royal Navy who fell in the fight for the Mole.

The saving of the ships sunk to bottle up the "U" boats is almost completed, and the beach of the Mole itself has been repaired. Zebrugge is now clear for the ferry service. In regard to the memorial, an Anglo-Belgian committee, under the presidency of Lord Emmott, are spending 500,000 francs on the column, dragon, which has been designed by M. Dupont, the Brussels sculptor, and will be set up near the Mole's as a symbol and a landmark to the seamen of the world.

Canada's Winter Jack Minors, an authority on bird lore, says that many migratory birds winter in Canada. That is to say, birds that used to be migratory now spend the winter in this country. This ought to make a good ad for Canada's winter climate.—Hamilton Herald.

Former Dean Dead Dr. R. E. Fernow, former Dean of the Faculty of Forestry, University of Toronto, and at one time connected with the chief division of forestry, United States Department of Agriculture, died at Toronto, aged 72.

Calgary Stampedes A stampede in which all Alberta will take part will be held in Calgary early in July, the first week of the annual exhibition. Guy Wedekind will take charge of the arrangements for the old-time western rodeo.

COLD SORES Chapped Hands Chills and Coughs

SOOTHES PIMPLES AND RASHES

Wild Boars Plague to Ranchers

From the few hogs that were freed on the island of Santa Cruz in 1547 have come a race of ferocious wild boars, which have lost every trace of their domesticity. They mature early, and can run like deer. They are a plague to the ranchers of the island, eating their garden stuff and gorging young stock.

HUSBAND DIDN'T DARE LEAVE HER ALONE HEART WAS SO BAD

Those feelings of faintness, those dizzy spells, the all-gone sinking sensations which come on from time to time indicate a weakened condition of the heart and a disordered state of the nerves.

MILBURN'S HEART AND NERVE PILLS

How no equal as a remedy to strengthen the heart, invigorate the nerves and build up the run-down system. Mrs. C. Vanhore, Ekville, Alta., writes:—"About a year ago I had heart trouble. My husband didn't dare leave me alone, and often had to stay up at night with me. I would just faint away, and it would sometimes be an hour before they could bring me back to life. Someone told me about Milburn's Heart and Nerve Pills. I got three boxes; I took them and felt much better, so continued all winter, and now I never feel any such faintness. I surely do appreciate the good they have done for me." Price 60c box at all druggists or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Eskimos Have Strong Teeth

Owing to the pure cold air they breathe, and to the constant exercise which puns and jaws get in chewing blubber, seal skin and so on, Eskimos have very strong teeth. Such a thing as a cavity or any form of toothache is unknown.

CORN'S Lift Off with Fingers

Don't hurt a bit! Drop a little "Freemore" on an aching corn, instantly it corns right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freemore" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

A sailing vessel was known to sail from San Francisco to New York in 76 days and eight hours.

Freedom from Asthma. Asthma is one of the most distressing troubles. It is in its attacks and prolonged in its agonies. Frequently many things are tried, but nothing seems to give hope of relief. Dr. J. D. Kellogg's Asthma Remedy is the one help which can be depended upon. If you have tried other remedies without success, try this to get at once a package of this uniformly successful preparation.

Minard's Liniment for Aches and Pains A Japanese is accustomed to place a flower in his room not as an ornament, but as a companion.

"Cascarets" 10c For Sluggish Liver or Constipated Bowels

When you feel sick, dizzy, upset, when your head is dull or aching, or your stomach is sour or gassy, just take one or two Cascarets to relieve constipation. No gripping—almost laxative cathartics for grown-ups and children. 10c a box. Taste like candy.

Household Hints Valuable Recipes For the Busy Housewife

Filling 2 eggs, 1/2 lemon (juice and rind), 1/2 cup sugar, 1/2 cup chopped almonds. 1/2 cup chopped Sun-Maid raisins. Stir yolks with sugar, add raisins, almonds and lemon. Beat whites to a froth, fold into mixture and fill in dough like pie filling. When baked and cooled cut into small cubes.

Cocunut Balls 1 tablespoon condensed milk. 1/4 cups shredded coconut (1/2 pound). 4 tablespoons Sun-Maid raisins. 2 tablespoons walnut meats (1/4 pound in shell).

Put the condensed milk into a small bowl and stir in a cupful of the coconut, which should be chopped, the raisins, which have been ground and chopped, and nuts at last, into balls the size of marbles, roll in the remaining coconut. Honey may be substituted for the condensed milk.

Columbus Called to the Bar Descendant of Famous Christopher Columbus Becomes a British Lawyer

Dr. C. J. Columbus, direct descendant of Christopher Columbus, has been called to the English bar in the middle temple. The doctor is a descendant of Diego, son of Christopher. The doctor being born at Malta, is a British subject. He studied law in the middle temple in the office of D. Campbell Lee, an American barrister practising in England, and has specialized in international law.

Children Cry for Fletcher's

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA? Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrup. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

more from March 6th to March 12th
and can be consulted at the Blairmore
Hospital.

Mr. Enos Jardine and his wife, Jen-
nie Jardine, have used the editor of
the Innisfail Province for alleged
slander. And the editor of that paper
professes to be not a bit rattled. Evi-
dently, with him hope springs eternal.

Bills are out this week announcing
special sales at the Blairmore Tradi-
ng Co's store, the Pass Clothing Co's
store and dances at Frank and Bel-
lieve, all the work of The Enterprise
job department.

It is interesting to note that the
city of Edmonton, the seat of the
provincial parliament, where all legisla-
tion is enacted and where practically
all is conceived, is in a position to re-
pudiate the largest per capita abuse of
the Alberta Liquor Act. Here's where
toleration, too, has begun at home.

Several miners of Hillcrest were
charged with infractions under the
Mines Act of Alberta before Justice
Gresham on January 24th. L. H. Put-
nam appeared in behalf of the ac-
cused and we understand that the
several charges were withdrawn. J.
Crowley, mine inspector, prosecuted.

Mrs. O. C. Edwards, of Macleod,
has been unanimously endorsed as
possible appointee to the Dominion
senate. This action followed the pre-
sentation of a resolution of the Re-
gina local council of women, to the
effect that as in all probability the
federal government will in the near
future take steps to appoint women
to the senate, that it be resolved that
the National Council of Women urge
the appointment as first woman sen-
ator of Mrs. O. C. Edwards in recog-
nition of the splendid services she
has rendered the women of Canada
by her intensive study of laws and by
the many reforms brought about
through the work of the laws com-
mittee, of which she is the national con-
vener.

FOR SALE—Ford Car, in good
condition, cheap. Apply to The En-
terprise.

HILLCREST HAPPENINGS

Word has been received from the
Jennings family, who left here a few
weeks ago to reside in Vancouver.
They are now on Vancouver Island.

One Hillcrest dog met another one
dog from Bellevue down near the es-
tupot the other day. Result—a fight.
Hillcrest one dog won.

When the good weather comes all
our young fellows will be strangers in
their new suits. Those in the latest
fashion are being built by a Blair-
more tailor. Several of the lads will
wear corsets as well. Hush!

On Saturday morning, about one
o'clock, the soft drizzle-empirium
known as the Green Dragon was dis-
covered to be on fire. At once the
whole town was on fire. The dance
stopped. It was soon found that ef-
forts would be futile and that the
building could not be saved. The resi-
dence next door, being so close, soon
got going. Efforts were then made to
save the residence of D. Welch and
it was saved. Three of Angus' suits
of clothes were borrowed by parties
during the fire, probably with good
intentions, and Angus hopes they will
be returned soon.

A most successful concert took
place on Wednesday night in the op-
era house here, kindly lent for the
occasion by Mr. Cole. The hall was
filled to overflowing. The proceeds
were in aid of the new organ recently
purchased by the Methodist church.
The chairman, Rev. Pinder, opened
the programme with a few remarks
and called on Mr. Johnson, of Cole-
man, to sing. Songs were also given
by Mrs. R. Pinder; impersonations by
Corporal Stevens, of Blairmore; duet
by Mr. Johnson and Mrs. Pinder; pi-
ano solo by Mr. G. Altham; musical
selection by Mr. G. Miller's band;
comics by D. Trickett; dramatic
sketch by Messrs. M. Price, L. Man-
cell, D. Trickett, H. Stobbs, R. Rich-
ards and Mrs. Pinder; musical selec-
tion by Ed. Royle's orchestra; cornet
solo by Mr. G. Goodwin, of Bellevue,
with Mr. Altham accompanist.

One of the most successful dances
of the season took place at the Union
hall on Friday night last, under the
auspices of The Sheiks. No place in
the Pass can stage a dance as well
as the boys of Hillcrest. It speaks
for itself when people come from Fernie,
Winnipeg and Macleod for such af-
airs. Balloons, confetti, etc., were
the order of the night. The dance
stopped for a couple of hours owing
to the fire, but after that was got
under control, it went merrily on. It
is to be hoped that the Sheiks will
repeat this affair as soon as possible.
Mrs. Altermatt's orchestra supplied
the music, and whilst it could have
been better—it's no use stacking
a banjo up against piano, trombone
and drums. There is no balance. We
have some really good players around
us, without having to engage outside
talent. Give us another soon, boys.

Jean Fournau has returned from
Rochester, where he underwent a suc-
cessful critical operation.

The hockey boys are getting
ready to operate on Van-
couver or Nelson.

CATCHING THE HART
Mother: "Now, dear, you must be
a good girl. We are going to Frank
tomorrow to a birthday party at Mrs.
Murphy's."
Little Girl: "An' mamma, kin we
have a special train?"

PUBLIC NOTICE

By the Board of Trustees of The
Blairmore School District No. 628 of
the Province of Alberta.

WHEREAS it is deemed expedient
by the Board of Trustees of the Blair-
more School District No. 628 of the
Province of Alberta, that the sum of
Fourteen Thousand Dollars should be
borrowed on the security of the said
District by the issue of Debentures
repayable to the bearer in Ten equal
consecutive annual installments, with
interest at the rate of not more than
eight per centum per annum for the
following purposes, namely:

That of erecting, equipping and
furnishing a new two-room addition
to the present school building.
THEREFORE notice is hereby given
by the Board of the said District that
unless a poll of the ratepayers of the
said district for and against the said
debenture loan is demanded ar-
proved by The School Ordinance
the said Board will apply to the Board
of Public Utility Commissioners for
authorization to borrow the said sum
by debentures.

Of which all persons interested are
hereby notified that they are required
to govern themselves accordingly.

L. DUTIL,
Chairman.

Dated at Blairmore, Alberta, this
Seventh day of February, 1923.

INSTRUCTIONS TO RATEPAYERS
In rural districts a poll on debenture
loan may be demanded by any
four ratepayers if the loan exceeds
\$2000 or if the loan is not for the
purpose of building a first school
house.

In town and village districts a poll
may be demanded on any debenture
loan by twenty and ten ratepayers re-
spectively.

Every demand for a poll should be
delivered to the Secretary of the Dis-
trict or in his absence to the chair-
man of the board within fifteen days
from the date of posting these notices.
A certified copy of this demand
should be forthwith forwarded to the
Board of Public Utility Commissioners
of Alberta at Edmonton.

CERTIFIED A TRUE COPY.
J. R. GRESHAM,
Secretary.

Athletic Girls—

After a hard game it is not
only the delicate fragrance of
Baby's Own Soap which
pleases, but also the wonder-
ful restfulness imparted by
its refreshing lather.

COWLEY HAPPENINGS

The recent thaw is putting the
roads in bad shape, making it difficult
to travel by auto.

Mrs. Hewitt has returned from
Pincher Creek, where she has been
taking medical treatment.

Mrs. McLaughlin, of North Fork,
is visiting her sister, Mrs. Dick Swift,
at Calgary.

Mr. and Mrs. Roland Easterbrook
were Tuesday visitors to Pincher
Creek.

Walter Smith has returned to
Lethbridge, after spending several
weeks here.

At present we are having a warm
wave that is making the snow disap-
pear quickly.

Around thirty local citizens went
to Blairmore on Saturday evening's
special train to witness the Edmonton-
Blairmore hockey game.

Mr. and Mrs. Rigaux and baby,
who started by motor from Texas
several weeks ago to pay a visit to
Mr. and Mrs. McKerrel, arrived here
this week.

A very enjoyable evening was
spent at whist here on Thursday last.
The winners for the first prizes were
Mrs. M. A. Murphy (pair silk stockings),
Wilfred Fortier (smoking set).
The ladies' consolation was won by
Mrs. Tustian, while the gent's con-
solation went to Gerald Smith. Supper
was supplied by Mrs. Latta and Mrs.
Leigh.

The Clarendon Review of date
February 16th, 1906, says: "Serg.
Risk, of the R. N. W. M. P., formerly
of Macleod, took charge here on Sun-
day last."

Radio messages can pass through
the earth as well as through the air.
The other day a private car equipped
with a radio instrument and running
on the tracks of the New York sub-
way fifty feet under-ground picked
up messages broadcasted from as far
away as Kansas. Of course, another
explanation is that some air may
have got into the subway.

"Doc" Barbour, of the Bellevue
Pharmacy, was a visitor to town yester-
day. Doc has not been bereft of
his cheerful smile through his recent
misfortune and while wearing the
crutches he carries beside his avoid-
ing a cheerful countenance and the
real appearance of a true sport Doc's
leg is still in "Paris," but he hopes
soon to give it an airing.

Pretty soon some of our parliamen-
tarians will become shareholders in
the Lethbridge Square Shooter.

Mrs. S. H. Kistuck, of Opportu-
nity, Washington, is a visitor with
friends in Blairmore for a few days.
